Elisabeth Gress

Relaxed Lady. Mixed Media

Elisabeth Gress lives and works in Switzerland. Her paintings and sculptures are characterized by the use of special expressions to give it a multifaceted meaning. The combination of different materials creates the impression of three dimensions, this is especially pronounced in her pictures. By applying this particular means of expression which she has mastered with her sculptures to her pictures, she is able to create the illusion of her pictures being mere objects.

Elisabeth is a member of many national and international art forums. She regularly exhibits in Switzerland and occasionally in other European countries.
